

## **HotSchedules to Showcase Mobile Applications for Restaurant Labor Management at NRA Show**

### ***HotSchedules' iSchedule 3.0 for iPhone enhances employee access and experience with comprehensive scheduling tools***

**Austin, TX – May 6, 2009** - HotSchedules today announced the release of HotSchedules iSchedule 3.0, the company's mobile application designed for the iPhone™ and iPod Touch™. Due to the increasing popularity of the iPhone and overwhelming requests for a compatible application, HotSchedules developed iSchedule to provide its users with instant, mobile access to its comprehensive online scheduling tools. HotSchedules will feature its employee-facing iSchedule application and a beta version of its manager-facing iSchedule application in booth #5678 at NRA 2009, May 16 -19 in Chicago, IL.

HotSchedules iSchedule 3.0 is a convenient, on-the-go application that enables employees to check their schedules, input upcoming schedule requests, send and review messages, check other employees' schedules of the same job code, and pick up and release scheduled shifts from anywhere on an iPhone with a Wi-Fi, 3G or EDGE network connection.

In the coming months, HotSchedules plans to release the manager-facing iSchedule application for restaurant managers to enable "on-the-go" scheduling, shift approval and employee communication. Additionally, HotSchedules is working to develop employee and manager applications for Blackberry® and Windows Mobile® users as well.

"We are always listening to our customers to find out how we can enhance our solutions to better serve them. Delivering accessible and cutting edge technology to our users is a commitment we have to our partner clients," said Ray Pawlikowski, president, HotSchedules. "Mobile applications are a natural progression for the fast-moving restaurant industry, and we're proud to be leading the trend with the first restaurant employee scheduling iPhone app and our additional mobile applications coming soon."

HotSchedules iSchedule is available now for download from the Apple® iTunes Application Store.
